EXAMINER'S AMENDMENT

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims:

- The recitation of "end cap" (claim 1, lines 3 & 8) was changed to --cover plate--.
- The recitation of "between" (claim 1, line 5) was changed to --between the--.

These minor changes were necessary to ensure that the specification and the claims have consistent terminology throughout and to correct an obvious typographical mistake. Authorization for this examiner's amendment was given in a telephone interview with Mr. Gary Essmann on August 5, 2004.

Examiner's Statement of Reasons for Allowance

2. The following is an Examiner's Statement of Reasons for Allowance: The prior art does not anticipate nor render obvious the combination set forth in the independent claims, and specifically does not show an axial piston compressor having a drive shaft extend out of a housing and a counter-ring integral with a cover plate, and a sliding ring that has a groove on the bearing surface that contacts the counter-ring. The applicant discloses that such a groove is advantageous to collect oil and to create two bearing

surfaces one after the other that increases the efficiency of the seal. Prior art devices do not teach the groove on the sliding ring, in addition, to the other claimed structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
